SUMMARY

Data Scientist with 1 years of combined study and project work.

SKILLS

data visualization, feature engineering, numpy, statistics, SQL, python, pandas, scikit-learn, ML, deep learning, a/b testing

EXPERIENCE

Data Scientist, Northwind Labs (fictional) Jan 2021 - Present

- Trained data visualization models with feature engineering and numpy to predict customer churn
- Engineered features using statistics and validated with SQL
- Queried warehouse tables in python to assemble training sets
- Presented results with pandas to non-technical stakeholders
- Improved recall by 12% after tuning hyperparameters

PROJECTS

Portfolio project: built a small application using data visualization.

EDUCATION

B.Sc in Information Technology, Demo University, 2018 - 2021

CERTIFICATIONS

Cloud Practitioner (sample certification), 2022
